

	<h2>Esercizi sul piano cartesiano</h2>
-----------------------------------------------------------------------------------	----------------------------------------

Metti in evidenza la zona del piano cartesiano in cui è soddisfatta la condizione algebrica data.

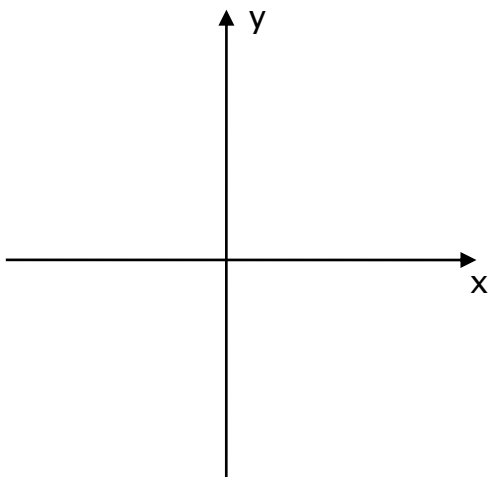

$x \geq 0$ (esempio)

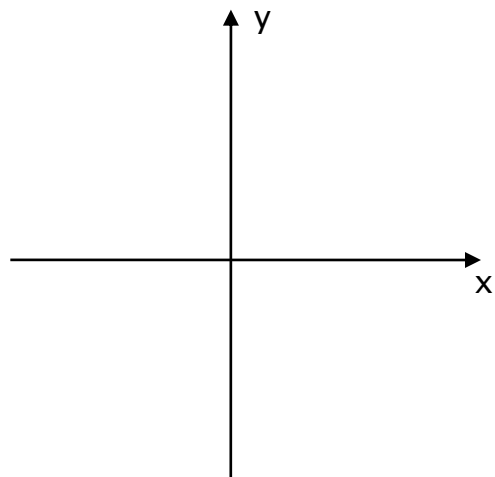

$y \leq 0$

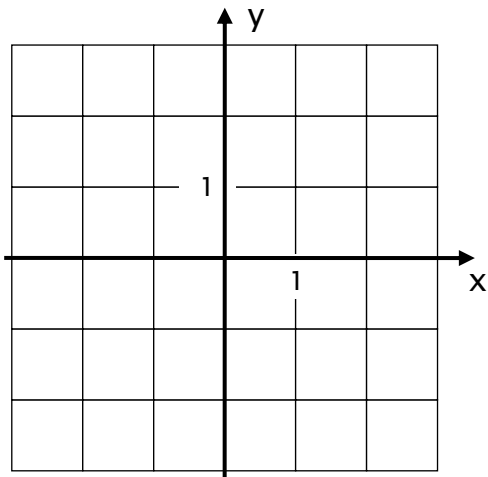

$x \geq 0$ e $y \geq 0$

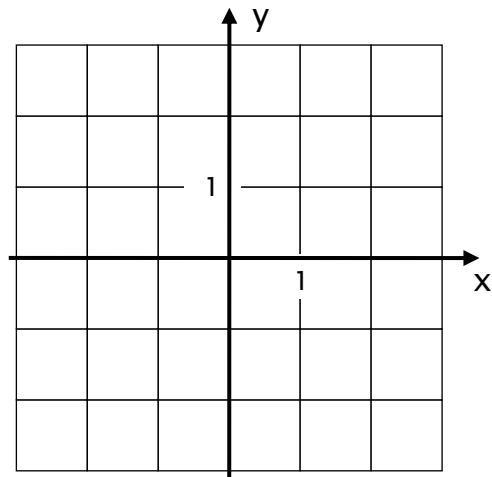

$x \leq 0$ e $y \geq 0$

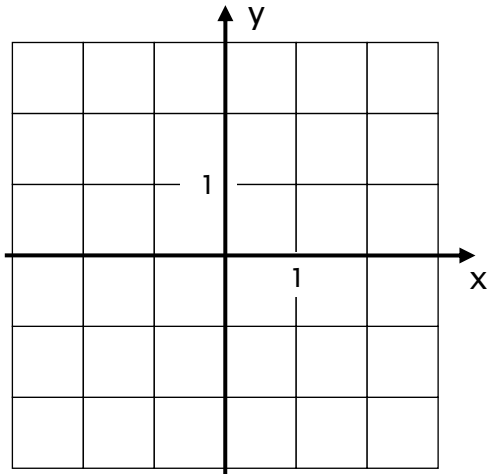

$$x \leq -1 \text{ e } y \leq -2$$

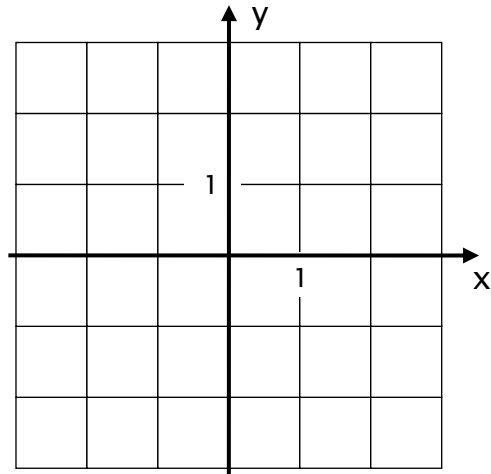

$$x = y$$

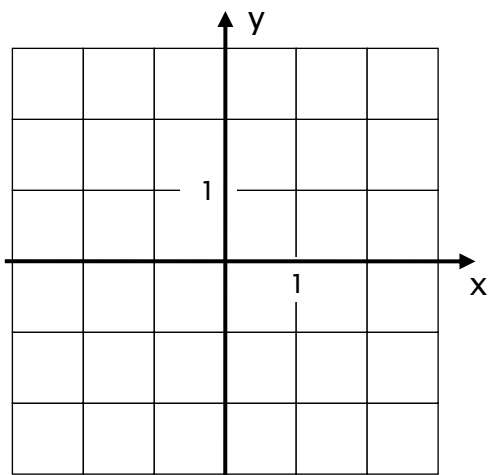

$$x \cdot y \geq 0$$

$$y = -x$$

$$\frac{x}{y} > 1$$

$$x^2 + y^2 = 2$$
